Adobe released Photoshop Touch for iPhone and iPad nearly three years ago, and I thought it was excellent. Piecing together a universal app that can run on both iPhone and iPad seemed like a great way to simplify the design process, especially for design teams. However, Photoshop Touch has been sitting on the sidelines for the better part of three years. Alright, let's run down why this is all the more frustrating. The General Assembly Design Conferences are a 12-day design conference hosted in Atlanta every year between June and July. Adobe has sponsored the 2014 Design Conference every year since 2010. This year, the 2015 Design Conference will be held from June 18 to 26 at the Westin Peachtree Plaza Hotel in Atlanta, Georgia. I want to make it clear that I'm a huge fan of Adobe, the company. I love their range of software, like Adobe Photoshop, Adobe InDesign, Photoshop Touch and Creative Cloud. However, as I also said earlier, it looks like Adobe have been dragging their feet with Photoshop Touch for a tad longer than they should have. Even though it's been a long time, I'm glad that they've finally released Photoshop Touch for iPad. In terms of the apps, you can get the Photoshop Touch app not only on the App Store, but for both the Apple and Amazon App Stores for a budget price. It includes the full versions of all the tools in the Photoshop Touch app, such as the Paths, Brush, and the latest CS6 features as well as additional tools. The app can handle the 3,276 × 2,312-pixel iPad Pro display at up to 2,048 pixels on each axis.

The Design Team, led by the undisputed king of creative software innovation and bestselling author of "The Art of Digital Photography," John Klusener, has created a set of compelling "under-the-surface" new features that set Photoshop CC apart as the best image editing application in the world. The Tools & Launch Bar feature virtually eliminates the need for mouse movement, mouse clicks, and clicks and drags. Additionally, Go to | Tools | Calendar will help you organize and manage projects using a single, easy-to-use calendar tool. Adobe has also introduced Family Sharing on the web, which lets you share your creative assets across your Adobe Creative Cloud membership online. Family Sharing will make it easier for you to collaborate on shared projects and work from different locations at the same time. Camera Raw, which debuted in Apple's most recent iOS and iPadOS 11 update, provides photographers with intuitive editing tools, eliminating the need for a well-established number of camera software plug-ins. The Pixel Fusion Pro app, meanwhile, automates some of the most common photo

editing tasks to make using your mobile images easier. There's also a standalone version of Content-Aware Scaling, which is a powerful image resizing tool not available in Photoshop, according to Adobe. It's called Content-Aware Scaling, and it's a new feature in Photoshop. It can be built into the Brush panel (using a few default settings), a menu item or hotkey can be added.
