This book is a solid opening repertoire for black using systems based on the move .c6. The basis of this repertoire is Caro-Kann vs. c6, which we will cover in detail in this and the next chapter. In this chapter we will look at the various systems that Black can use. In the next chapter, we will discuss their application in the fight for the initiative. After covering the basics, we'll look at applying these systems to specific chess combinations. In the following chapters, we will focus on tactical combinations in which Black plays for the initiative.
